Wilkhahn

Insit

The flat seat upholstery with the backrest placed on top makes Insit an appealing eye-catcher that looks equally good in homes (783/55).

Insit

780 range, design: Wolfgang C. R. Mezger

The design of contemporary office and commercial furniture needs to convey a distinct corporate identity and foster collaboration and a feeling of well-being. All three aspects are reflected in the Insit upholstered furniture range. Whether as a standalone piece or linked to form a sectional group, the characteristic design with its stylishly modelled frame, flat upholstery, and distinctive backrest positioned on top is a symbol of collaborative working with a feel-good flair. With a light and airy design, the firm upholstery guarantees agile comfort and, at a seating height of 45 cm (17¾ inches), enables people to hold discussions, work, or eat and drink at standard table heights. And last but not least, Insit's variety of models and configurations makes it a multipurpose, attractive eye-catcher that allows office workers to sit, interact, and work together.

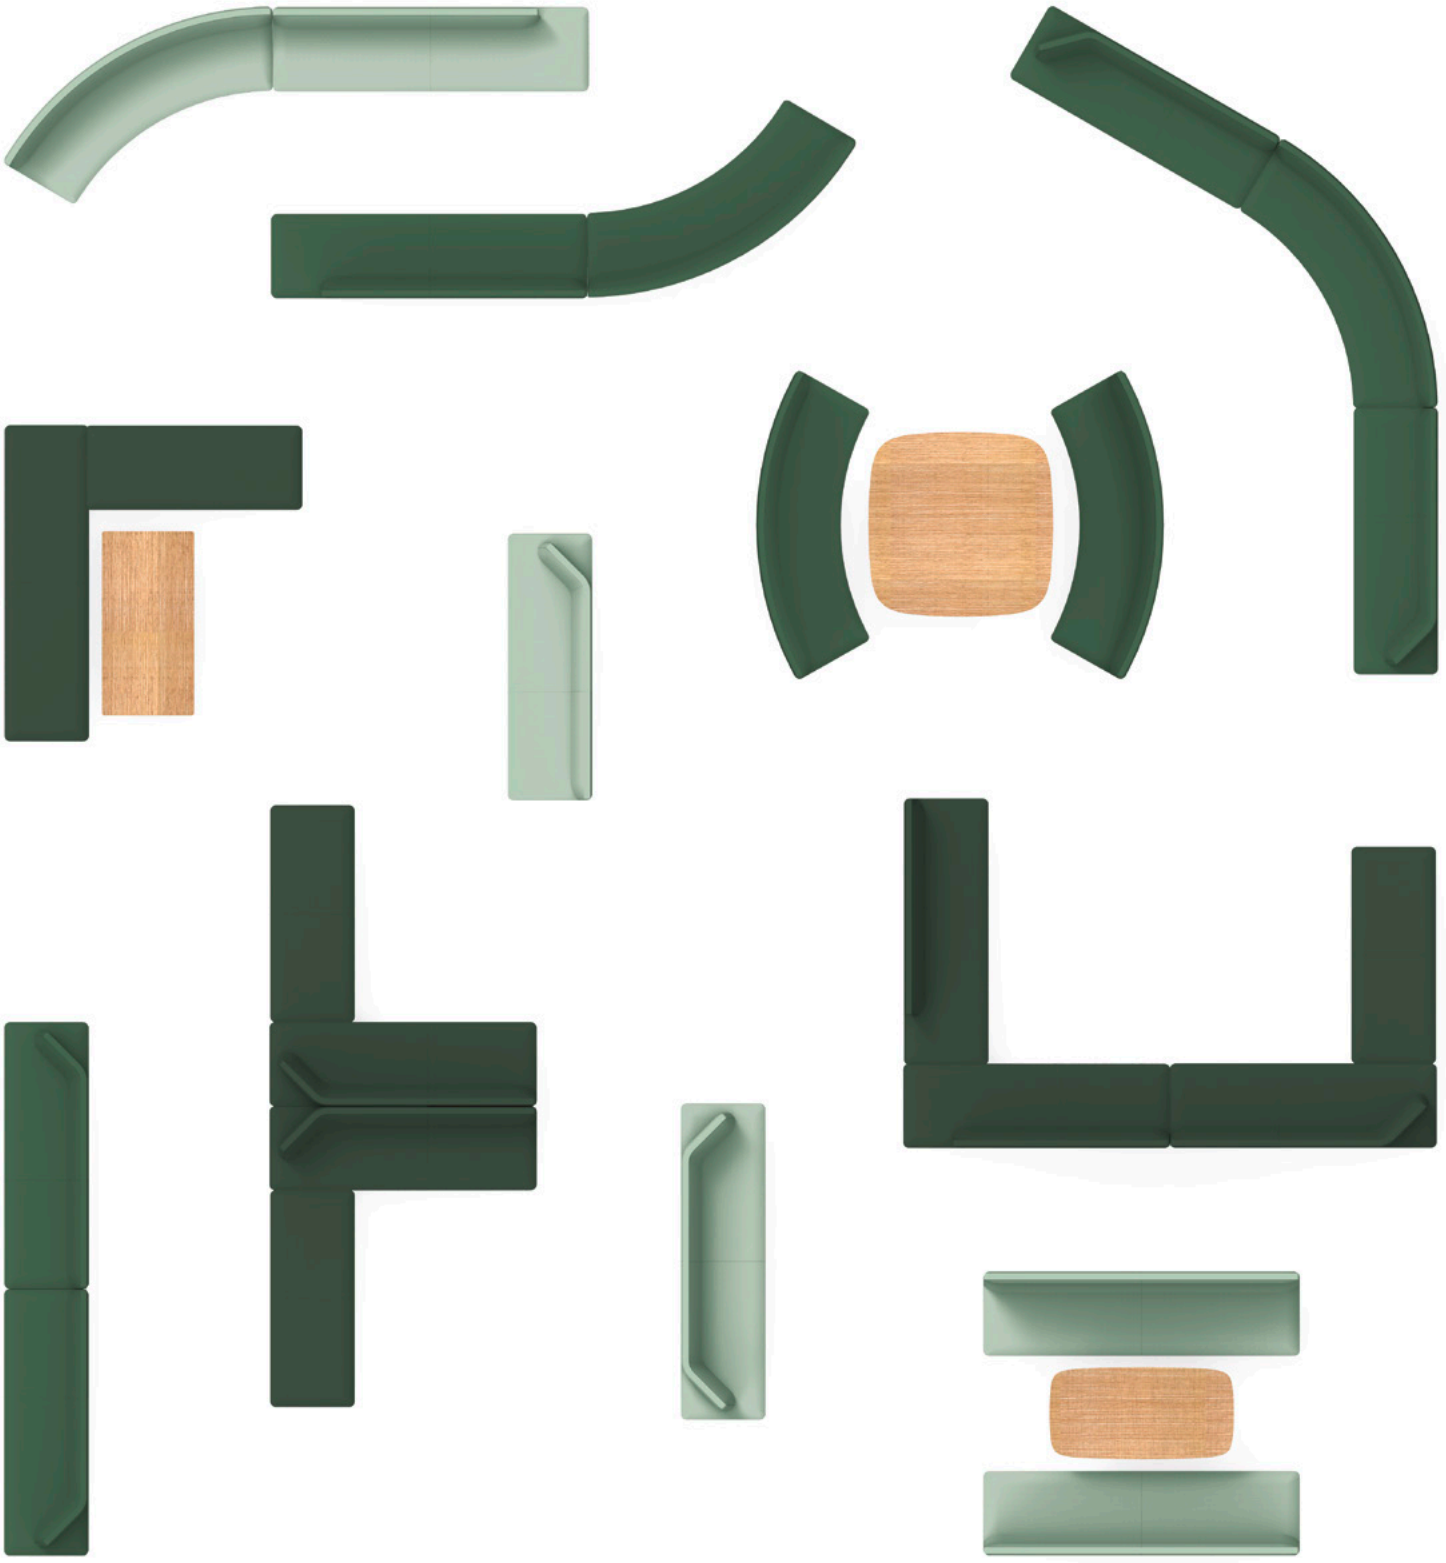
The sculptural quality of the design is particularly distinctive in the single benches with backrests. While the slimline upholstery has clear contours, the backrest's molded and subtly organic shape promises superior comfort. The three-seaters are especially inviting and offer a multitude of sitting options. Just like a chaise longue, they have a shorter backrest that curves

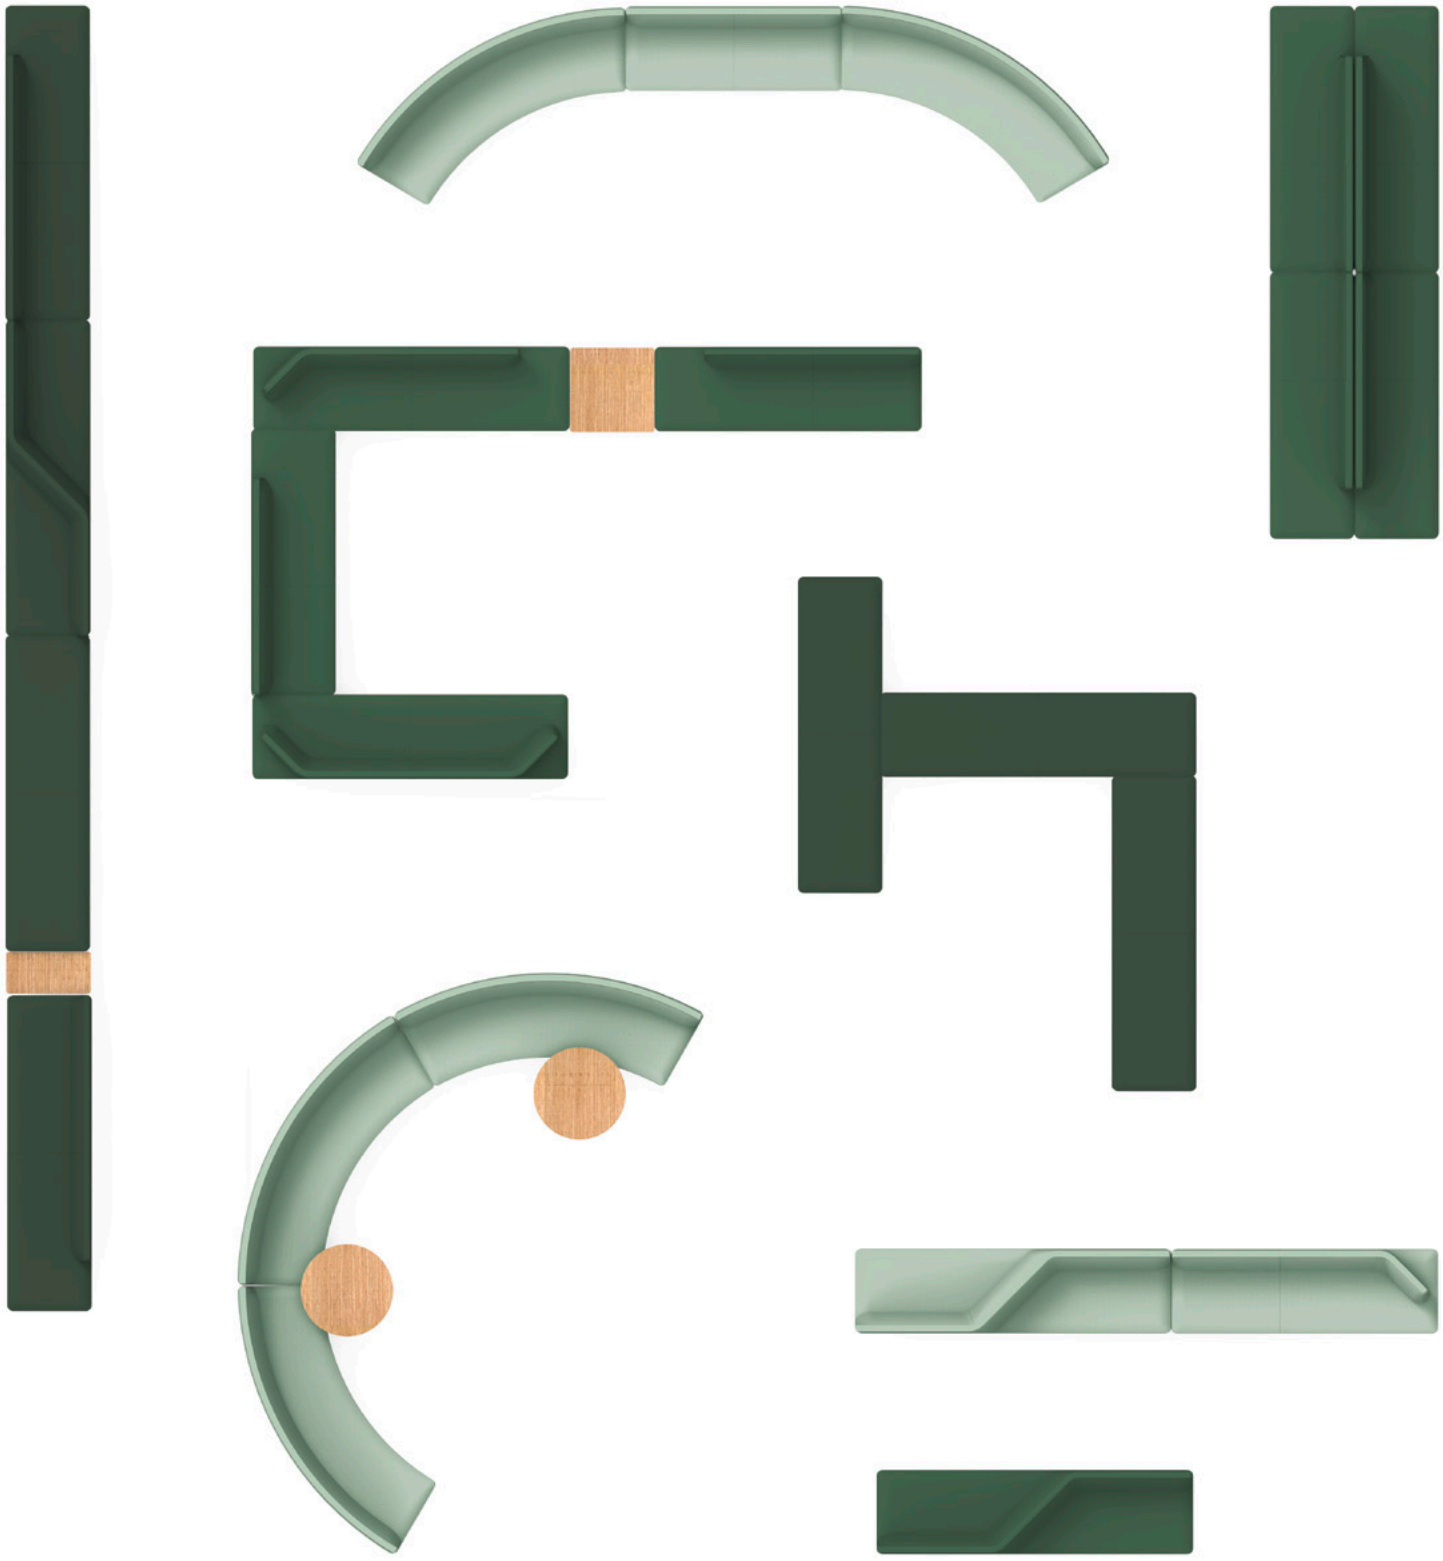
around on one end and an edge that protrudes over the frame on the other. The 45° angle of the backrest encourages the person seated there to talk to their neighbor, while the end without a backrest can be sat on from all angles (783/52).

The benches with high backrests can be placed anywhere in a room or against a wall ...

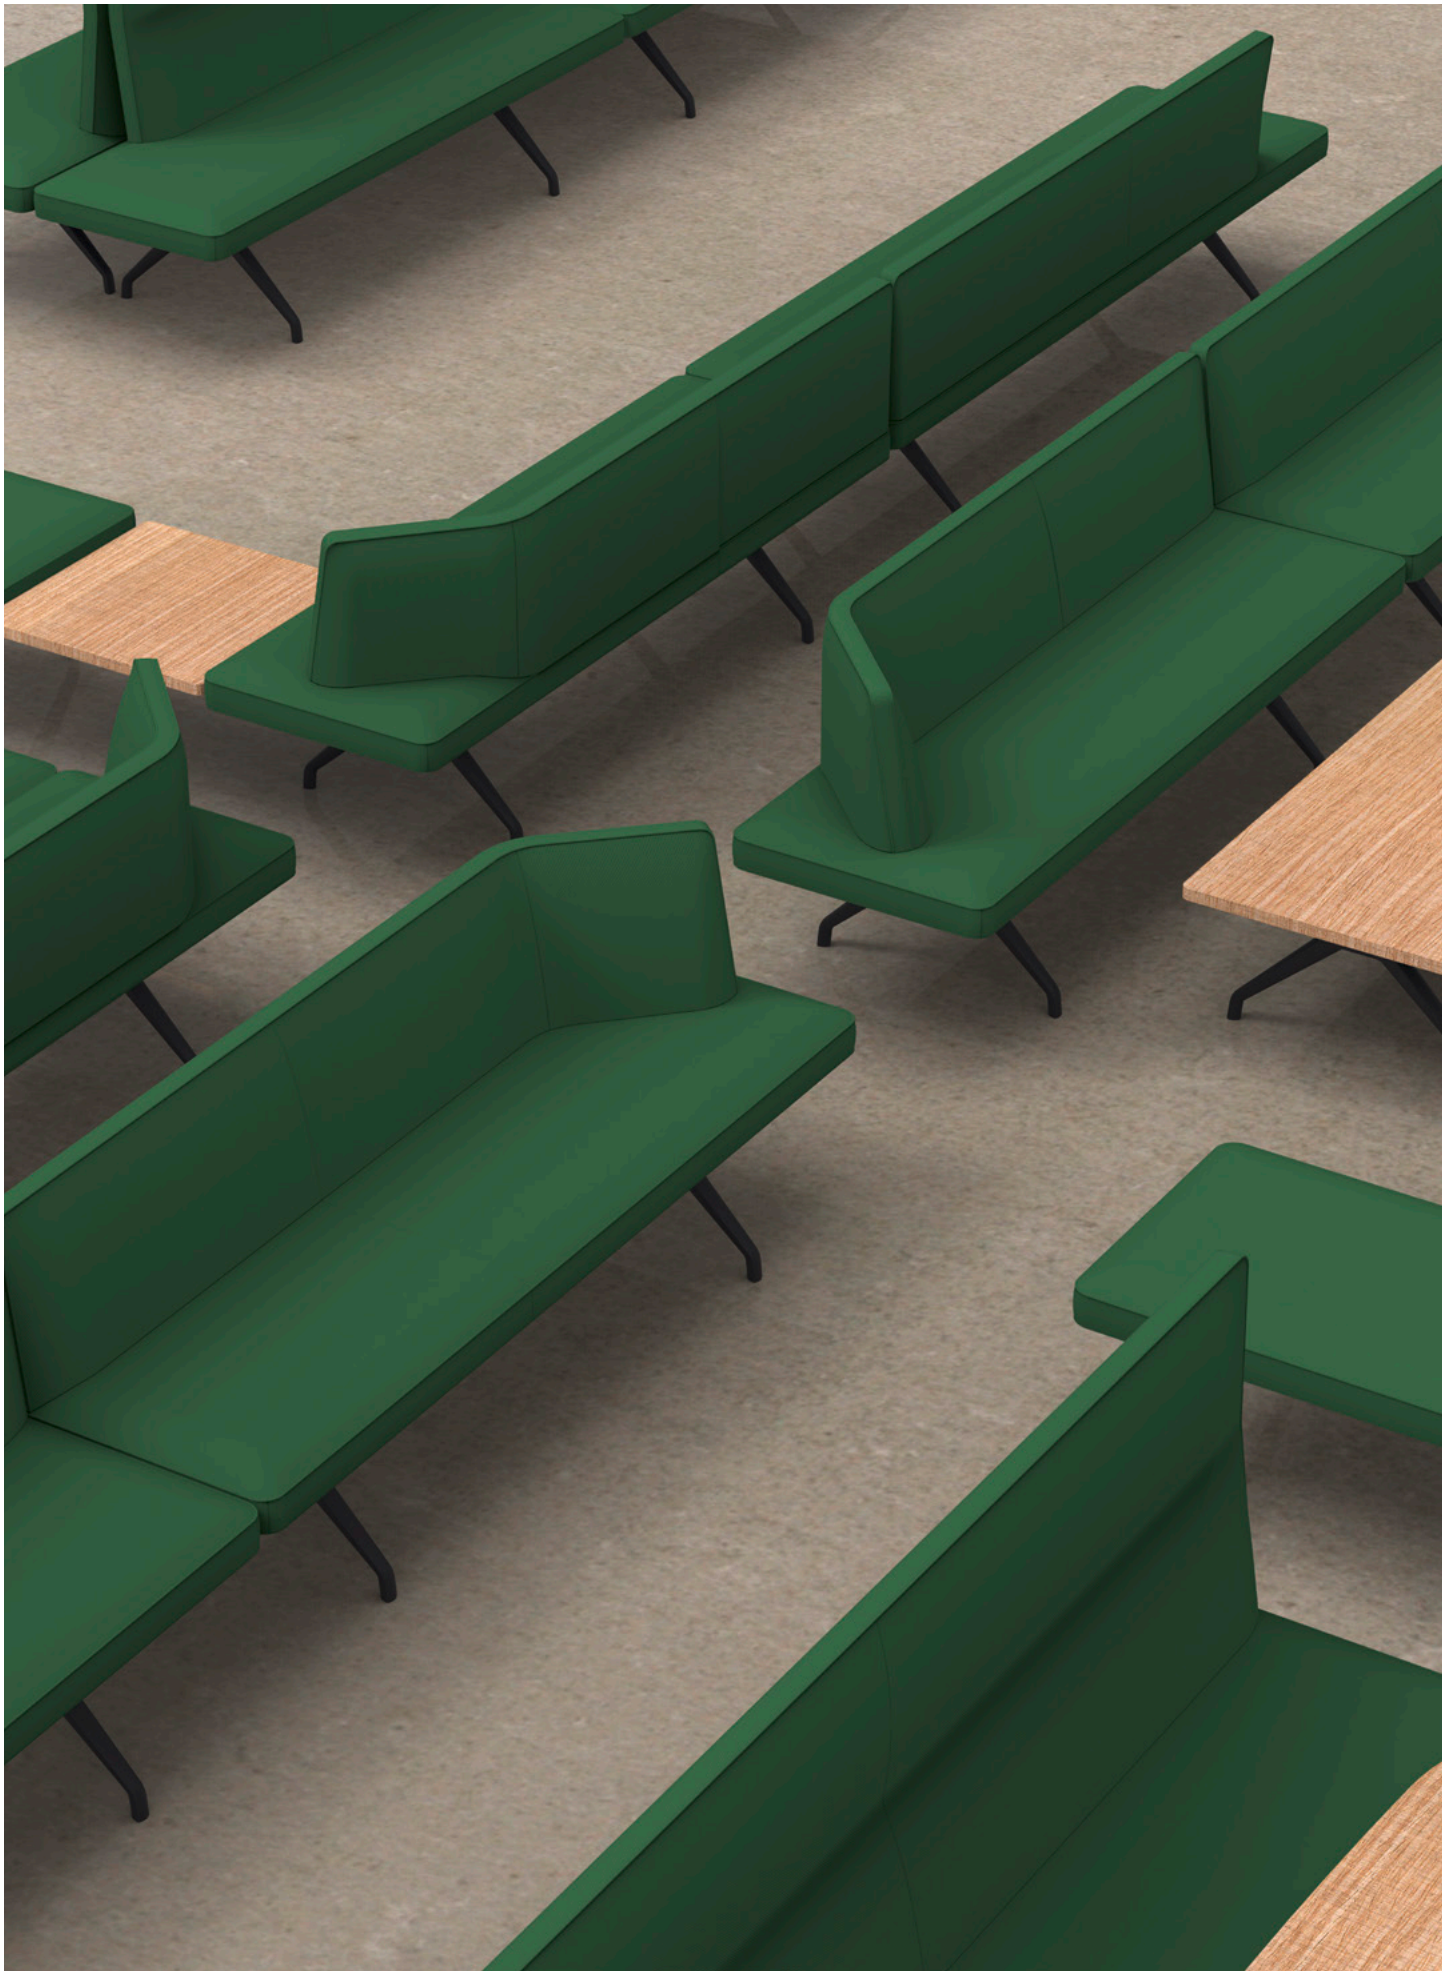
... a customized curved version, like the one seen here, can also be made for a cafeteria.



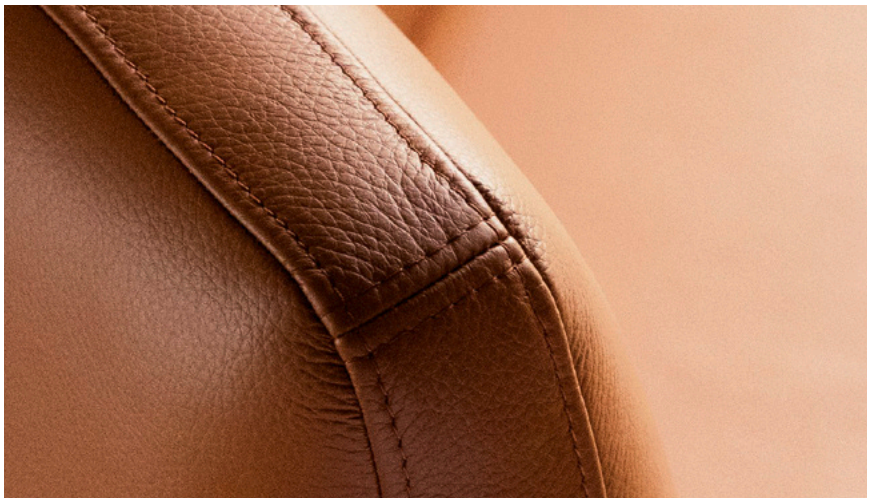
The standard models already allow a virtually endless number of combinations. The range of two-, two-and-a-half, and three-seaters measuring 165 cm (65 inches) to 240 cm (94½ inches) in width and 65 cm (25½ inches) in depth includes benches which are straight, radial, or linked at a 90° angle at the corner and come with straight backrests or ones that are angled on one or both sides. Some models feature extended seats to offer space at the ends, and the three-seater is even available with a backrest that changes direction to turn it into a two-and-a-half seater. As a standard, the straight models are also available with high backrests if more privacy is required. By contrast, benches without backrests invite people to come and sit on all sides or to lie down – for example in quiet areas.



Thanks to inline connectors with screws, the individual modules can be linked directly or using connecting leaves to reconfigure whole sectional groups that people can sit and work on however they like. The range of benches is also complemented by matching tables; the frames of the lounge tables, which are 38 cm (15 inches) in height and 70 x 140 cm (27½ x 55 inches) in size, are the same as the frames on the benches. All tables for working, eating and drinking, or holding meetings at come in 73 cm (28¾ inch)-high square (70 x 70 cm [27½ x 27½ inches], 140 x 140 cm [55 x 55 inches]) or round (70 cm [27½ inch] diameter) versions or as rectangular pedestal tables (70 x 140 cm [27½ x 55 inches]), and all have sturdy steel frames.



The range's diverse formats and features guarantee that the furniture can be used in lots of places in today's offices – from lobbies, co-working spaces, and areas in the middle of rooms to meeting spaces and quiet zones to cafeterias and restaurants. Coated, polished, and ultra-polished frame surfaces (which are coated and bright chrome-plated in the case of the pedestal tables), the wide choice of upholstery from Wilkhahn's fabric and leather collection, the HPL, plywood, or MDF tabletops with straight or chamfered edge profiles, and the high-quality laminate or veneer surfaces offer an enormous range of design options to suit all sorts of interior design concepts. The distinctive design language serves as the common denominator and combines diversity with a clear identity.



The details are equally as impressive as the form. The facings all the way around feature precise flat-felled seams, and the seams in the seat and backrest have decorative double saddle stitching.

The benches' fully upholstered seats and backrests are top quality, hard wearing, and designed for frequent use. They consist of solid beech frames with cut foam and cold foam upholstery, which has fleece overlay between the foam and the cover. This makes the furniture pleasant to sit on and protects the foam from mechanical wear and tear.

The high-quality craftsmanship continues in the base frames of the bench and the lounge table; made in one piece from die-cast aluminum that tapers at the bottom, they give the bench and the lounge table a stable yet elegant, floating look. Its lightweight appearance also pays off in terms of functionality – the area where feet are placed is unobstructed, making the furniture simple to grip and reposition as desired and the floor underneath easy to clean.

The connecting table panels can be fitted with integrated techni-stations, which can optionally feature cable outlets or various inputs (for electricity, wireless charging, Keystone modules, USB charging ports).

If required or specified, under-mount power units available with power outlets and USB charging ports.

Inline connectors with screws allow the benches and connecting table panels to be connected linearly or at the back.

Straight plastic edge; straight wood edge; E2 – 5 chamfered wood edge, 12 mm (½");
E5 – 1 solid-core HPL, edge chamfered, 4 mm (5/32") radius

Table top groups

Laminate (single color), soft matte laminate, wood decor laminate, veneer type 1 or 2,
black or white HPL (high pressure laminate). For additional surfaces, please see our media center.

You can find all upholstery material and additional colors in our media center.

The digital sample colors may differ from the originals.

Technical information

Upholstered benches with backrests and benches without backrests

The A-line base frame comes in polished or high-luster polished die-cast aluminum or is coated white, black, or with a silver satin finish. Black polyamide glides are ideal for carpets and also have a felt insert for hard flooring. The seat is connected with the frame using a tabletop bearer made of black coated sheet steel. The seat and backrest have a beech frame (with an extra panel integrated into the seat) and are upholstered all the way around with contour-cut foam. The seat cushioning made of cold foam with a fleece overlay and the back cushioning made of contour-cut foam are both fully covered with fabric or leather. A high-quality synthetic leather, Evida 58, is available as a vegan alternative to semi-aniline and vegetable-tanned leather.

Tables

The lounge table's A-line base frame is identical to the frames of the upholstered benches with backrests and the benches without backrests. The pedestal frames for tables used to eat and drink, work, or hold meetings at are made of round steel tubing, coated in white, black, or a silver satin finish, or optionally of brushed stainless steel or bright chrome-plated, and a steel disc base (Ø 51 cm [20 inches] or Ø 95 cm [37½ inches] in diameter) covered with sheet steel and with surfaces to match the round tubing. The braces on the connecting table panels are made of black-coated flat steel with four screws to connect tables and benches securely.

Depending on the edges, the tabletops are available with plywood surfaces with straight wood or plastic lipping for veneered or laminate surfaces, or as MDF tables tops with chamfered wood lipping for veneered surfaces (the tabletop thickness is 26 mm [1 inch] in each case) or with a black or white through-dyed chamfered HPL solid-core panel (tabletop thickness 12 mm [½ inch]).

Depending on the tabletop thickness, the lounge table heights vary from 36.5 cm (14½ inches) to 38 cm (15 inches) and the pedestal table heights from 73 cm (28¾ inches) to 74.5 cm (29½ inches).
