When planning office space, one of the most important tasks is encouraging interaction between people. The decorative and sound-absorbent Landing wall relief gives spaces an upgrade, creating a welcoming atmosphere in areas where the likelihood of people bumping into one another is high but where room for seating groups and side tables is normally lacking – hallways, cross-over spaces, and stairwells.

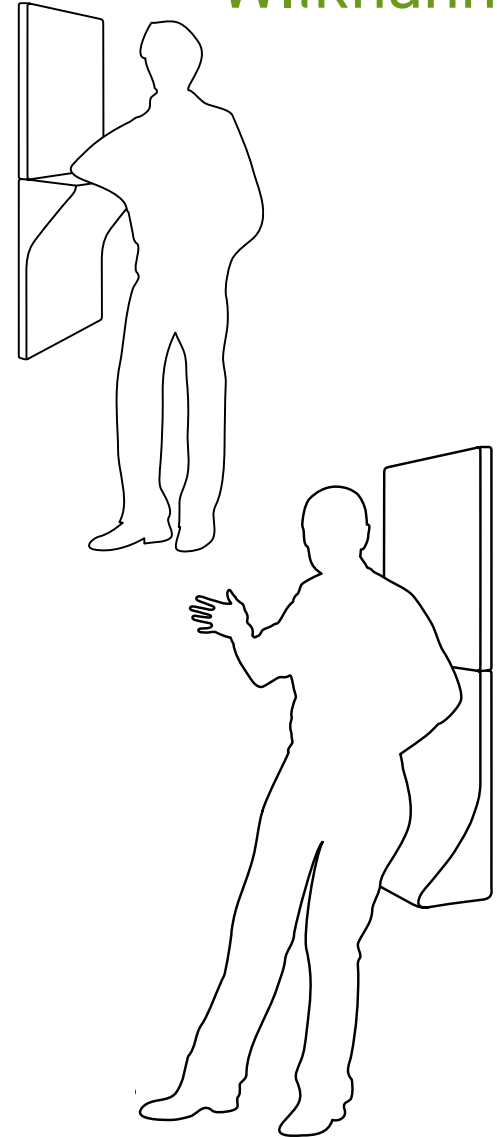

The combination of flat and projecting square elements provides all sorts of opportunities for people to take short breaks. The modules improve acoustics, create little corners for chats or phone calls, offer spaces to leave drinks or smartphones, and take the strain off people's feet.

Design: Rudolph Schelling Webermann

Function

Decorative and sound-absorbent wall relief that can be combined as desired to lean, sit or place things on in aisles, cross-over spaces and staircases in order to encourage users to meet and talk to other people.

Model 208/1 flat element

Core panels made of laminated wood with PUR foam (flame retardant CMHR) upholstered and covered in fabric.

Model 208/2 relief element

Core panels made of laminated wood and MDF, upholstered with PUR foam (CMHR, flame retardant) and covered in fabric. Can be fitted vertically to lean or horizontally to perch on, or rotated by 180° to make a table-cum-shelf, which then optionally comes with optional sheet steel surface screwed on from the inside, coated with a textured matt finish in grey. With two integrated attachments for each edge length that enable users to hang it up and engage it at any right angles and four fittings to mount it to the wall.

Wilkhahn

A decorative and sound-absorbent wall relief that can be combined as desired to lean, sit, or place things on, consisting of upholstered and fabric-covered laminated wood modules (projecting element also made of MDF) and with four wall fittings each for assembly by the customer. Although they're not very thick, the modules comply with sound absorption class B. Due to the exclusive use of CMHR foam, depending on the fabric cover selected the upholstery can meet a range of fire protection classifications and standards.
