Sola
Design: Justus Kolberg
Sola is made and sold
on licence from
Davis Furniture, NC, US.

In typical Wilkhahn style, the swivel-mounted and height-adjustable Sola conference chair combines innovative comfort with a crisp design and high-quality appeal. The chair's aesthetic is defined by the linear shape of the seat shell and the distinctive lines of the aluminium frame. The frame branches out from the centre column into a V-shaped support that culminates in the armrests. The clever part is that the slender seat shell is swivel-mounted at the front and connected with a V-shaped support by two pressure springs at the rear. As a result, the chair offers sprung comfort, adjustable to suit preferences and a rocking motion so body and mind stay alert however long meetings last.

In addition to the clear design and the rocking feature, the first-class craftsmanship of the upholstery is also impressive. The back of the covered plywood shell includes double-thickness upholstery which creates a gap all the way round. This enhances the already slender profile. The type with management grade upholstery also has facing all the way round and quilted stitching, lending the chair a classy and slightly luxurious touch.

The conference chair models are optionally available with load-dependent braking castors. They can also come with multi-purpose glides plus additional felt for flooring that easily scratches. The chairs have gas lifts for continuous height adjustment with the levers matching the overall design. The frame is made of die-cast aluminium, the surfaces are optionally high-lustre polished, or with black or matt silver satin coatings. Topstitching in the backrest prevents creases from forming. The management grade upholstery version includes additional facing all the way round, sewn on with a quilted seam, giving the chair an elegantly casual and subtly luxurious feel. Covers for the seat shell and cushioning can be chosen from the especially high-quality fabric and leather collections. Armrests come with additional optional armrest pads made of fine-grained, black plastic or leather.

The shell, swivel-mounted at the front, sits on the V-shaped support due to two pressure springs at the back. The springs are encapsulated, making them look like shock absorbers. These springs allow pre-adjustment of the counterpressure. A practical serrated knob can be turned to make the counter pressure harder or softer depending on body weight, leverage and individual preferences. A retractable lever ingeniously stops any rocking motion if required.

The Wilkhahn fabric collection offers plenty of choice for Sola to marry with different interior-design concepts. At 50,000 to 150,000 rubs, pure Trevira CS wool and blended fabrics are guaranteed to last a long time.

Like the frame surface, the die-cast aluminium armrests are lustre polished, or with black or matt silver satin coatings. They are pleasant to touch and offer reliable support when getting up.

The management grade upholstery lends the clarity of the design a subtly casual character. The felt-like covers in this upholstered version look particularly modern and inviting. The topstitching all the way round and the facing give the shell an even more slender appearance.

In the coated versions we recommend selecting the armrests with a finely grained, black cover made of through-dyed plastic to prevent scratches. The same applies if they feel too cold.

The leather covers are available in various colours and two different types of quality. The embossed leather is especially durable and easy to care for. The vegetable-tanned leather has Blue Angel certification. Its beautifully soft quality quickly shows signs of wear and tear and shine.

The armrests with leather-covered armrest pads look particularly sophisticated and attractive and are always colour-matched with the leather upholstery. Similarly to the fabric covers, the finely grained plastic pads are also available for the robust leather covers.
