Model: visitor chair
Design: Andreas Störko

Models:

231/1 Aline with seat- and backrest covers, without armrests
231/2 Aline with seat- and backrest covers, with armrests

Chair dimensions:

Seating height: 45 cm
Total height: 80 cm
Width: 50 cm (without armrests), 59 cm (with armrests)
Depth: 57 cm

Weight:

6.5 kg (depending on the design, without packaging)

Packaging info:

Box sizes for a chair in cm (L x W x H): 74 x 74 x 87
Volume in m³: 0.48

Function:

Lightweight, transparent swivel-mounted visitor chair for meetings, client-support areas and temporary office spaces.

Frame:

Four-star base in die-cast aluminium, bright chrome plated. With glides made of black polyamide for soft floorings. Fixed height rotating column with contact suppression feature, bright-chrome plated casing.
Optional: black polyurethane glides for hard flooring.
Optional: glides made of black polyurethane with extra felt for flooring that easily scratches.

Seat and back:

Seat- and backrest frame made of very strong, glass-fibre-reinforced polyamide, black, grey or white through-dyed, covered with high-performance, coated polyester fabric to colour-match the seat- and backrest frame. Backrest frame without or with armrests in the same material and colour.

Optional: when the seat- and backrest frame are black through-dyed, two-colour cover in copper-black or silver-black.

Optional: seat cushion, seat shell made of polypropylene and seat cushion made of cut foam, covered with fabric from the Wilkhahn fabric collection.

Optional: seat cushion with stitched fluting on the cover, seat shell made of polypropylene and seat cushion made of cut foam, covered with fabric 47 from the Wilkhahn fabric collection. Cushioning thickness 10 mm.

Optional: higher backrest (total height: 82 cm). In model 231/2, the armrests are the same height as the edge of the table.

Cushioning:

All foam used is CFC-free

Environmental product information:

Material used: plastics: 41%, steel 27%, aluminium 32%

Returns, disassembly and recycling:

All components in the Aline visitor chair are suitable for non-destructive disassembly.

To ensure that materials can be sorted according to type, all components weighing more than 150 g have been labelled accordingly. No agents to protect materials or organic halogen compounds are used which would prevent subsequent recycling. A total of 91 per cent of the chair can be recycled.
